

ROJO MACHINES FINLAND

ROJO 80 LC

Rojo 80 LC is a compact pan mixer designed to mix the toughest concrete qualities. This mixer is made to withstand wear and tear. The mixingpan is manufactured from Hardox wear resistant steel and can handle very hard use. This feature is appreciated by companies hiring out construction machines.

The mixer is easy to clean and maintain. The paddles and mixing arms are bolted to the central bridge. The bridge is fixed by a nut that can be opened by hand. The bridge, together with the paddle arms, can easily be lifted out from the mixing pan for easy cleaning.

The mixing pan itself can be mounted in two different positions. One for emptying the mix into buckets and the other for discharge into a wheelbarrow or pump. If, after years of use, the pan should wear out it can easily be replaced by a new one. The versatility, robust construction and ease of maintenance, is unique to mixers of this size.

Capacity:	150kg concrete/mortar/grout 100kg of refractory castable
Power:	3,0 kw 400V/50Hz, 44 rpm
Gearbox:	Planetary
Material:	Hardox 400, wear resistant steel
Total height:	116 cm
Discharge height	65 cm
Weight:	155 kg
Max width:	76 cm, fits through doorways
Wheels:	Ø 250 mm, easy to move around
Lid:	Wire mesh with bag cutter is as standard

MANEUVERABILITY:

There are handles on both sides of the mixer to allow easy maneuvering by one man.

MAINTENANCE:

The bridge holding the paddle arms can be lifted out without the use of tools for easier cleaning.

EXTRAS:

The mixer can be made dustproof with different add-ons. This is very useful when working in indoor spaces, where dust generation is a major problem.

SPARE PARTS:

All parts can be replaced as a single item and are available from the manufacturer.
