

ROJO MACHINES FINLAND

ROJO 1000 LC

Rojo 1000LC is the biggest and most advanced mixer model we have in our production range. The mixer is designed to mix the toughest concrete qualities and to withstand wear and tear. It is easy to maintain and all wearing parts are quick to replace.

The mixer is equipped with five mixing paddles and a beater. The mixing arms are all bolted to the central bridge and the position of all the paddles can be adjusted individually. The paddles are positioned so that the batch is quickly and homogenously mixed even at very low water quantities.

The metal net lid of the mixer is split into two halves and hinged so it is easy to open for cleaning. It is normally equipped with two bag cutters. It is also possible to add a big bag cutter.

Capacity:	800 - 1000kg of refractory monolithic.
Electric motor:	30 kW 400V/3-Phase/50Hz, adjustable rpm with a frequency converter
Gearbox:	Planetary gearbox
Material:	S355 steel
Height:	190cm
Drainage height:	Adjustable legs.
Weight:	1200kg
